DETAILED ACTION

1. Claims 1-19 are pending in the application.

Allowable Subject Matter

2. Claims 1-19 are allowed.
3. Claims 1-19 are allowable over the prior art of record because the cited references do not contain a closed loop transmission antenna diversity method employing a selective combining method when a plurality of antennas are used in a base station of a mobile communication system, the closed loop transmission antenna diversity method comprising the steps of: (a) measuring channel information from signals transmitted from the plurality of antennas used in the base station and outputting a channel information matrix; (b) transforming the channel information matrix according to a transform matrix composed of a complex basis vector set; (c) calculating reception power with respect to the plurality of antennas based on the transformed channel information matrix; and (d) transmitting antenna selection information obtained based on the calculated reception power to the base station as feedback information for controlling transmission antenna diversity.
